LAYERS FEED

PULLET STARTER MASH

This feed is specifically formulated to meet all the nutritional requirements of layer chicks from day 1 (week 0) to week 8. Chick starter crumbs facilitate optimal growth and development of layer chicks, which has a bearing on its performance as a laying hen. Each bird is expected to consume 2kg of feed.

PULLET GROWER MASH

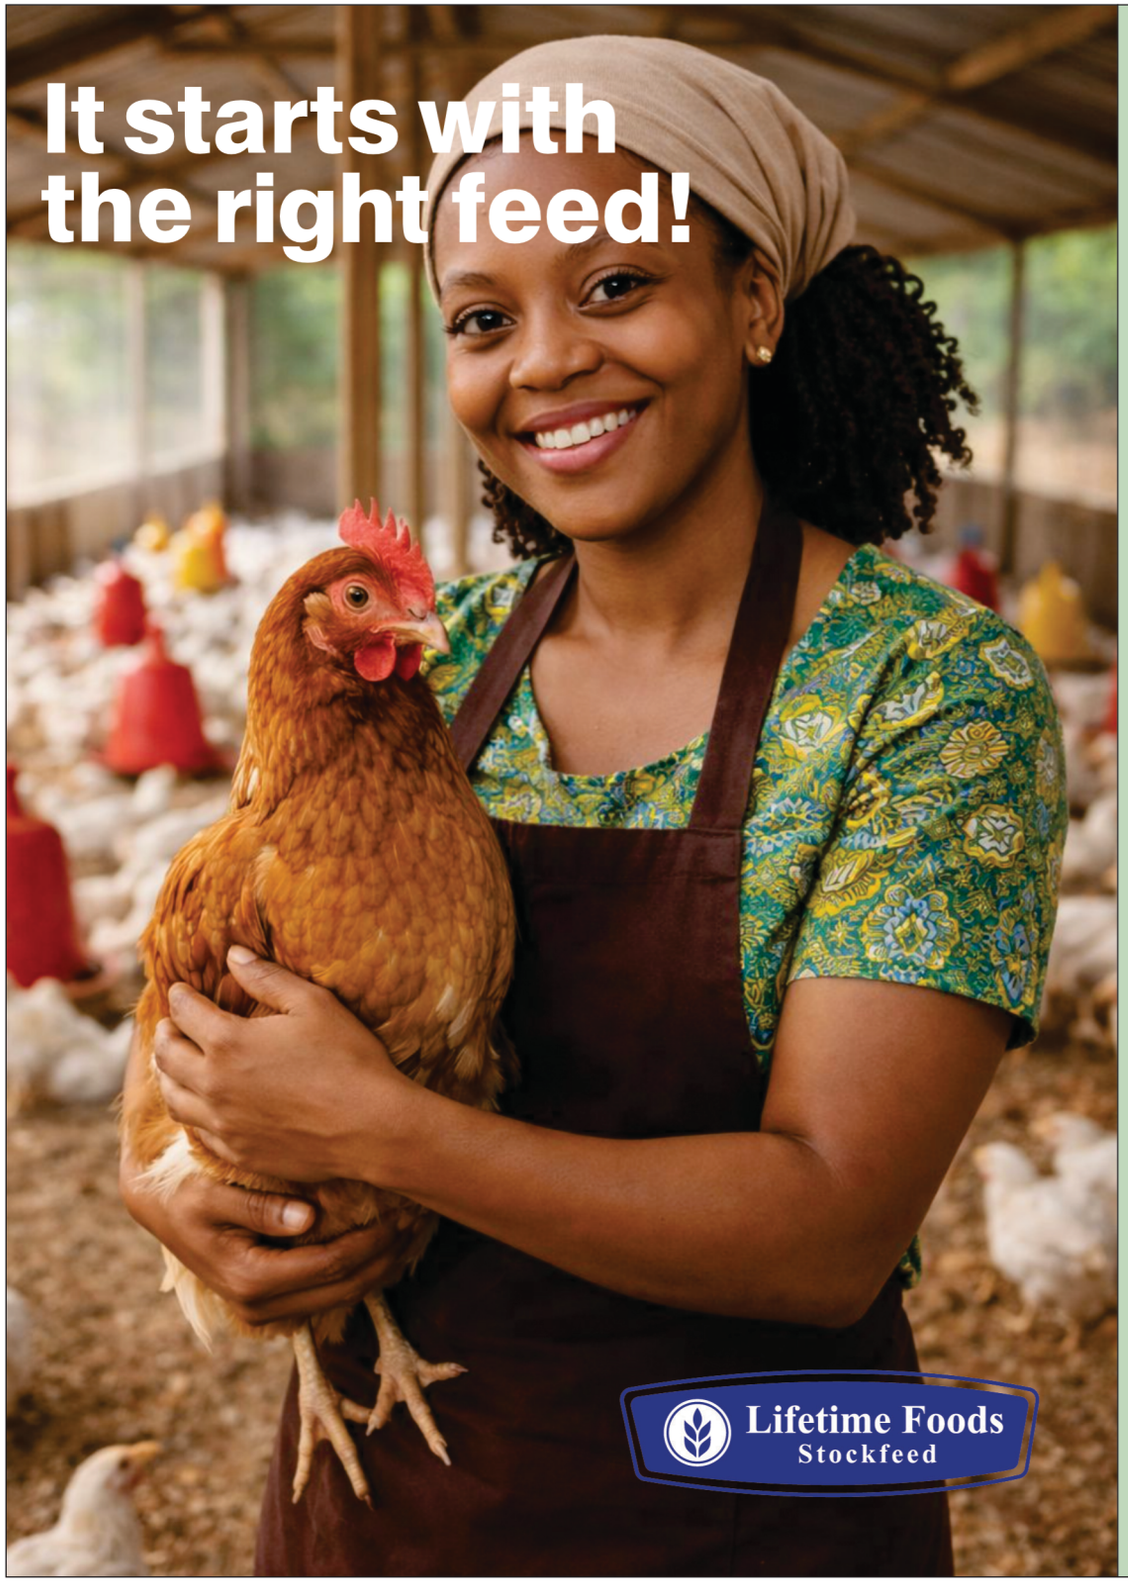

This feed is designed to support healthy growth and reproductive development in pullets, readying them for egg production. It is fed from week 9 to week 15, with each pullet expected to consume 4.5kg of feed during this period.

START LAY MASH

Start-lay mash is feed given to pullets from week 16 up to end of week 17. At this stage, the birds are preparing to start egg production; hence a predetermined ration is given. Each bird consumes between 115g to 120g of feed per day. During the 2 week period, the average feed per bird is 1.65kg.

STANDARD LAYERS MASH

This feed is formulated to meet the nutritional needs of a laying hen from the onset of lay to culling. Each bird is expected to consume 125g of feed per day.

SUPERIOR LAYERS MASH

This feed is designed to support growth and egg production in underperforming commercial layer birds. It also maintains normal egg production rate towards the end of lay period. Each bird is expected to consume 120g of feed per day.

LAYERS CONCENTRATE

To obtain layers mash, mix layers concentrate with crushed maize in a ratio of 2:3 respectively. This should be done by weight.
Each bird is expected to consume 125g of feed per day.

Feed	Age (weeks)	Feed intake
Chick starter mash	0 - 8	2kg
Chick grower mash	9 - 15	4.5kg
Start-lay mash	16 - 17	115g – 120g
Standard layers mash	18 – end of lay	125g
Superior layers mash	18 – end of lay	120g
