ROADRUNNER FEED RANGE

ROADRUNNER STARTER MASH

This feed is meant to feed free range and indigenous chickens from day 1 to the end of week 8. Each bird is expected to consume about 2 to 2.5kg of feed during this period.

ROADRUNNER GROWER MASH

This feed is formulated to feed free range
and indigenous chickens from week 9 up to point of lay or slaughter, depending on the farming practice. Each bird is expected to consume 4.5kg to 5kg of feed at point of lay. This feed does not contain a coccidiostat!

ROADRUNNER BREEDER MASH

This feed is designed to support egg production in free range chickens. Feed from onset of lay throughout the entire egg production period. Each bird is expected to consume an average of 120g of feed per day. This feed does not contain a coccidiostat!

ROADRUNNER BREEDER CONCENTRATE

To obtain roadrunner breeder mash, mix 2 parts of breeder concentrate with 3 parts crushed maize by weight. Follow the feeding instructions for roadrunner breeder mash. Each bird consumes 120g of this feed.
